CONFERENCE CENTER

**AUDIO VISUAL
INFORMATION & PRICE LIST**

Welcome to the Maritime Conference Center!

The following pages include our current AV capabilities and pricing information. If you should have any questions, please do not hesitate to ask your conference planner for more information.

Standard AV Package

Our standard Daily Meeting Package (DMP) includes the following AV Package in your general sessions meeting space:

- A Laser Projector
- Screen
- Podium
- Microphone
- 2 Flip Charts w/ Markers
- Pens
- Notepads

The following are included in the rental of the Auditorium* as part of the Daily Meeting Package (DMP) :

- Podium with built in Comfort Monitor and Wired Microphone
- One Wireless Microphone (can be Handheld or Lavalier)
- Laser Projector
- Screen

**Minimum of 150 people required to rent this space.*

Maritime Conference Center performed a complete overhaul of our public Wi-Fi services in 2014. In addition to securing the services of a leading hospitality-focused support and engineering company to manage our infrastructure, we upgraded our internal cabling to CAT-6 standards, installed 95 access points capable of supporting over 28,000 users and we boast 200Mbps bandwidth over redundant dedicated fiber optic Internet connections.

Both wired and seamless Wi-Fi service is available in all of our guest rooms and throughout the property. And as always, this is a complimentary service to our guests. We offer additional services for our conference and meeting guests such as private V-LAN, web conferencing, reserved bandwidth and dedicated technical support at competitive rates.

- 200Mbps bandwidth
- 95 access points
- Ability to support over 28,000 users
- Complimentary WiFi service in meeting rooms and hotel rooms
- Private V-LAN, Web Conferencing and Reserved Bandwidth also available

As part of our Standard Daily Meeting Package (DMP), Maritime Conference Center is proud to enhance your Auditorium experience by providing a state-of-the-art Podium with built-in Comfort Monitor and wired microphone, Laser Projector, 12'x12' Rear Screen, 24'x24' Front Screen, and use of our in-house sound system.

We also provide one additional microphone with your rental of the Auditorium space. In order to ensure our systems function well for our customers, clients are not able to modify our settings, unplug or replace any of our equipment.

Should you have requirements above and beyond what we offer, we can setup a consultation with our AV Specialist to explore potential options.*

Thank you for helping us to care for our equipment!

**Consider adding Simulcasting or Webcasting to enhance your event. Further details and pricing are included in our AV Price List.*

Epson Pro Laser Projector with 4K Enhancement

The Pro L1505UHNL combines laser light source, inorganic components and 3LCD technology for powerful, uncompromising images. This premium large-venue projector features native WUXGA performance with Epson® 4K Enhancement Technology. Delivering 12,000 lumens of color/white brightness, the Pro L1505UHNL offers bright, vivid color, while its laser light source engine and electrostatic air filter provide virtually maintenance-free operation for up to 20,000 hours.

This sleek black projector includes Edge Blending and 360-degree projection for a variety of installation applications. Its integration capabilities include 3G-SDI and HDBaseT™ connectivity, plus nine optional powered lenses (sold separately).

Project System:	High-aperture Epson 3-chip 3LCD
Native Resolution:	WUXGA (1920 x 1200) w/ 4K Enhancement Technology
Color Brightness:	12,000 lumens
White Brightness:	12,000 lumens

Marshall ELCO™ – ADA36 Podium

This ELCO™-ADA36 is quick ship, height adjustable and ADA wheelchair accessible. The ADA wheelchair accessible surface is a standard feature and opens electronically to the required ADA wheelchair knee space. Options shown on the top include a mount box with medium cable reservoir. The interior includes optional 10 front and 8 rear rack units, while the standard locking doors and locking rear access panel are standard features. The floor includes a hole for cable pass and floor vent, while the toe is notched for passive air intake and access to the 4" swivel locking casters.

Built-In Comfort Monitor

Added to our podium is a 24" Comfort monitor so that the speaker can see their own content without having to turn their back to the crowd. The controls for our new system are stationed on the podium. We have a Crestron TSW-760 7" touch screen display that will not only turn our system on, it also controls the laptop volume, screen up and down and full camera controls for our simulcast.

Vaddio Roboshot 30E Video Camera

With our simulcast capability, you have several different settings from which to choose. While in the overflow room, not only can you see the content displayed in the auditorium, you can also see the speaker at the same time using our picture in picture controls. As with our video being a direct link, our audio is also a direct link to the overflow room.

Another great addition to our system are the various source connections. Clients can connect to our system using VGA, HDMI and wirelessly using Crestron's air media.

Simply type in the given URL, select your client (Windows/MAC), type in the given code and you can present your audio and video with no cables or wires. This addition allows clients to present from their iPad, android tablet and even their phone by simply downloading the Crestron Airmedia App.
