

Green Programs:

Recycling

To reduce its waste throughout the Conference Center:

- A recycling program is in place, which includes paper, cardboard, aluminum, and glass.

Water Conservation

In an effort to conserve water:

- Our Housekeeping Department encourages guests to contribute to the success of this program by placing signage explaining the importance to saving water by reusing linens and towels while staying multiple nights.
- Motion sensors at public restroom sinks have been installed.

Energy Saving

In an effort to increase sustainability the property is:

- Working to change its parking lot lights to LED and will continue to make improvements as fiscally possible.
- Replacing incandescent light bulbs with LED light bulbs in guest rooms and dining area.
- Installed motion detectors in meeting rooms and offices so that lights automatically turn off when not occupied.
- Upgrading HVAC units to more energy efficient models as replacements are needed.
- Closing drapes at the end of the business day to conserve energy.

Environmental

- Keeping a close review of the fertilizers and chemicals used in landscaping.
- Pursuing ways to mitigate water run off through the use of retention ponds and other activities.
- Planting trees.
- Increasing green space when possible.
